

Strategy Document: Open Banking in Canada — Threat/Opportunity Analysis for the Big Six

Portfolio project — mock engagement for demonstration purposes

Sign-off matrix:

Name	Team / Role	Date
Jatin Sagwal	Business Analyst	14/07/2026

Proposer: Jatin Sagwal

Status: Draft > Under review > Implemented | Not implemented (current status: Draft)

Primary dataset: Project data tracking workbook — Canada regulatory/market data (Canada Gazette, Open Banking Tracker, FinTech Magazine, SEDAR+ filings) and UK/US/Australia/India open banking adoption statistics (Open Banking Ltd, FDX/CoinLaw, CDR.gov.au, Sahamati).

Secondary dataset: Narrative/qualitative source log — trade press and industry-event coverage (Open Banking Expo, The Logic, McMillan LLP, Payments Association) used for competitive and regulatory context rather than quantitative modeling.

User Profiles

The intended audience is Strategy & Innovation leadership at a Big Six bank, along with Risk, Compliance, and Digital Banking leads. They are expected to use this dashboard in quarterly strategy reviews and ad hoc board-briefing prep — checking regulatory milestone status at a glance, drilling into revenue-at-risk by product line when preparing investment cases, and comparing the bank's competitive posture (e.g., Cor.Connect participation) against peers. Usage is expected to be periodic (monthly/quarterly) rather than daily, so the dashboard should prioritize clarity and defensibility of each number over real-time refresh.

Dashboard Functionality

Dashboard Feature	Your Request
Reference dashboard	Loosely modeled on Open Banking Ltd's public API Performance dashboard (openbanking.org.uk/api-performance) for the regulatory-tracking panel, combined with a standard executive revenue-at-risk summary panel (single-page, KPI-tile-driven layout).
Access	Portfolio version: public, view-only (this is a demonstration project). In a real deployment: limited to Strategy, Risk, Compliance, and Digital Banking leadership.
Scope	Included: Big Six retail banking segment, Canada regulatory timeline, UK/US/Australia adoption benchmarks, India/EU as contextual footnotes. Excluded: commercial/business banking, wealth management, and markets outside the five benchmarked countries.

Dashboard Feature	Your Request
Date filters and granularity	Yes — a date range filter defaulting to 2018-present (to show full UK adoption history) with a granularity toggle (yearly / quarterly) for the adoption-curve chart. Canada panel defaults to 2026-2027 (the CDBA rollout window).

Metrics and Charts

Create a table for each chart to include in the dashboard.

Chart 1

Chart title	Open Banking Adoption Curves: Canada Forecast vs. UK / US / Australia
Chart type	Multi-line time series chart (years since launch on x-axis, so curves are aligned regardless of calendar year).
Dimension(s)	Country (UK, US, Australia, Canada-forecast), Years since launch.
Metric(s)	Cumulative users/connections (UK), FDX connections (US), active CDR consumers (Australia), forecast adoption scenarios — conservative / base / optimistic (Canada).

Chart 2

Chart title	Estimated Revenue-at-Risk by Product Line (Big Six, Base Case Scenario)
Chart type	Stacked bar chart.
Dimension(s)	Product line (payments, lending, deposits/account fees), Bank (representative Big Six bank or aggregate).
Metric(s)	Estimated CAD revenue at risk under base-case adoption scenario, as % of total segment revenue.

Chart 3

Chart title	CDBA Regulatory Milestone Tracker
Chart type	Horizontal timeline / Gantt-style milestone chart.
Dimension(s)	Milestone (Royal Assent, Phase 1 read-access, Phase 2 write-access/payments), Status (complete / in progress / upcoming).
Metric(s)	Target date, days remaining to next milestone.

Chart 4

Chart title	Big Six Strategic Posture Map
Chart type	Quadrant / matrix chart.
Dimension(s)	Bank (RBC, TD, BMO, CIBC, Scotiabank/Tangerine, National Bank).
Metric(s)	Axis 1: Public commitment level (low to high, based on disclosed statements/JV participation). Axis 2: Digital/fintech exposure (estimated share of digital-native customer base).

Dashboard mockup

[Wireframe sketch to be inserted once layout is finalized: top row = KPI tiles (at-risk population, days to Phase 1, estimated revenue-at-risk); middle = adoption curve chart (Chart 1) and milestone tracker (Chart

3) side by side; bottom = revenue-at-risk breakdown (Chart 2) and strategic posture map (Chart 4) side by side.]
